Discover VuWall’s many free services offered to AV, IT and security consultants.

We’re committed to helping consultants succeed. Our dedicated team of experts provides the tools and information you need to select the right technology and ensure that every project is specified properly the first time.
VuWall provides a complete ecosystem of interoperable products built on the unique hybrid technology, VuTrex™. VuTrex bridges AV, IT, and IP systems for the most effective distribution of visual information, from any source to any display or video wall, throughout organizations.

**INTEROPERABLE** Seamless integration to reduce deployment time and risk.

**HYBRID** Handle a variety of source types and display formats.

**SCALABLE** Modular architecture to future-proof your deployment.

**NO PROGRAMMING** Configuration and operation with easy drag and drop.

SOLVING INDUSTRY CHALLENGES

Challenges

A WIDE VARIETY OF TECHNOLOGY
Handle different types of video formats, display technology, and software tools to fulfill the different visualization needs throughout an organization.

CUSTOM PROGRAMMING
Controlling different components often requires custom programming and relying on stable and well-documented API's from each vendor. This is very costly and time-consuming.

CHANGE OF SCOPE
Between the start and end of a project, requirements can change. Change orders and redesigns may demand complex adjustments.

Evolving Technology
Designing a project with the confidence that in years from now it will be possible to integrate new technology with the existing infrastructure.

Solutions

A single management platform that bridges AV, IP and IT systems, able to handle a variety of source formats (HDMI, H.264, SDVoE, Web, RSS) and a variety of display formats (LCD, LED, single monitors, video walls, architectural displays, projectors).

A single management platform with easy drag and drop operations and a built-in control panel designer.

A scalable solution built on a modular architecture with a drag and drop interface that facilitates the redesign of preset configurations that include new devices.

A standards-based, interoperable solution that is built on an open architecture and easily integrates with third-party components with an extensive and fully-documented API.
