TECHNOLOGY INTEGRATION IMPROVING EFFICIENCY IN CONTROL ROOMS

The VuWall and Q-SYS seamlessly integrated solution empowers operators to consolidate systems to achieve greater efficiency in their operations. The plugin is designed to streamline control room operations by enabling direct control of VuWall's ecosystem from the Q-SYS interface without any programming required.

VuWall worked closely with Q-SYS, which has fully vetted and endorsed the TRx plugin integration with a Q-SYS Certified Badge. This plugin was developed and supported by AD-DA.ca and certified by Q-SYS.

Key features of the TRx Q-SYS plugin include:

- **Seamless Control:** Manage VuWall's TRx system directly within the Q-SYS environment — no programming required.
- **Enhanced Visibility:** Access real-time system status and feedback from the Q-SYS interface.
- **Advanced Functionality:** Easily launch layouts, presets, and scripts — all from a unified platform.

> "VuWall's new Q-SYS plugin reinforces our dedication to simplifying operations in mission-critical environments and to providing an open, flexible, and interoperable ecosystem of solutions for our partners and customers."
