

CONTROL ROOM BUNDLES

**For the highest quality visualization
in mission-critical environments**

An Immersive Viewing Experience

Samsung and VuWall come together to offer a flexible and versatile video wall solution, designed for the unique demands of mission-critical control room environments.

Samsung and VuWall Solutions

Designed for security operations, traffic surveillance, and network operation centers in military & defence, public safety, transportation, and security environments. Samsung and VuWall provide exceptional picture quality and visualization experiences from any source to any display.

Samsung

Comprehensive line-up of professional displays tailored specifically for control room applications, including large-scale LED signage and video walls available in QLED 8K and ultra-wide high resolution monitors.

VuWall

Unique and innovative technology that combines AV-over-IP distribution with advanced video wall and KVM management, delivering easy to configure and easy to use interoperable and flexible solutions for mission-critical applications.

[DISCOVER MORE](#)

*TUV-certified for Intelligent Eye Care, protects eyes against excessive blue light with Eye Saver Mode and a Flicker Free feature.

VuWall video wall processing and management

PAK nodes are compact, reliable, and scalable video wall processing appliances, managed by the powerful TRx software, ideal for multi-room visualization, situational awareness, control rooms, and corporate workspaces. PAK and TRx simplify video wall deployments and operations, improving operator efficiency and increasing project ROI.

- High performance, scalable, and versatile video wall processing with modular design
- Decode any source type and visualize it on any type of display with the utmost flexibility
- PAK and TRx are approved by Samsung Europe for seamless compatibility*
- Simplified deployments and operations with easy drag-and-drop interface

[DISCOVER MORE](#)

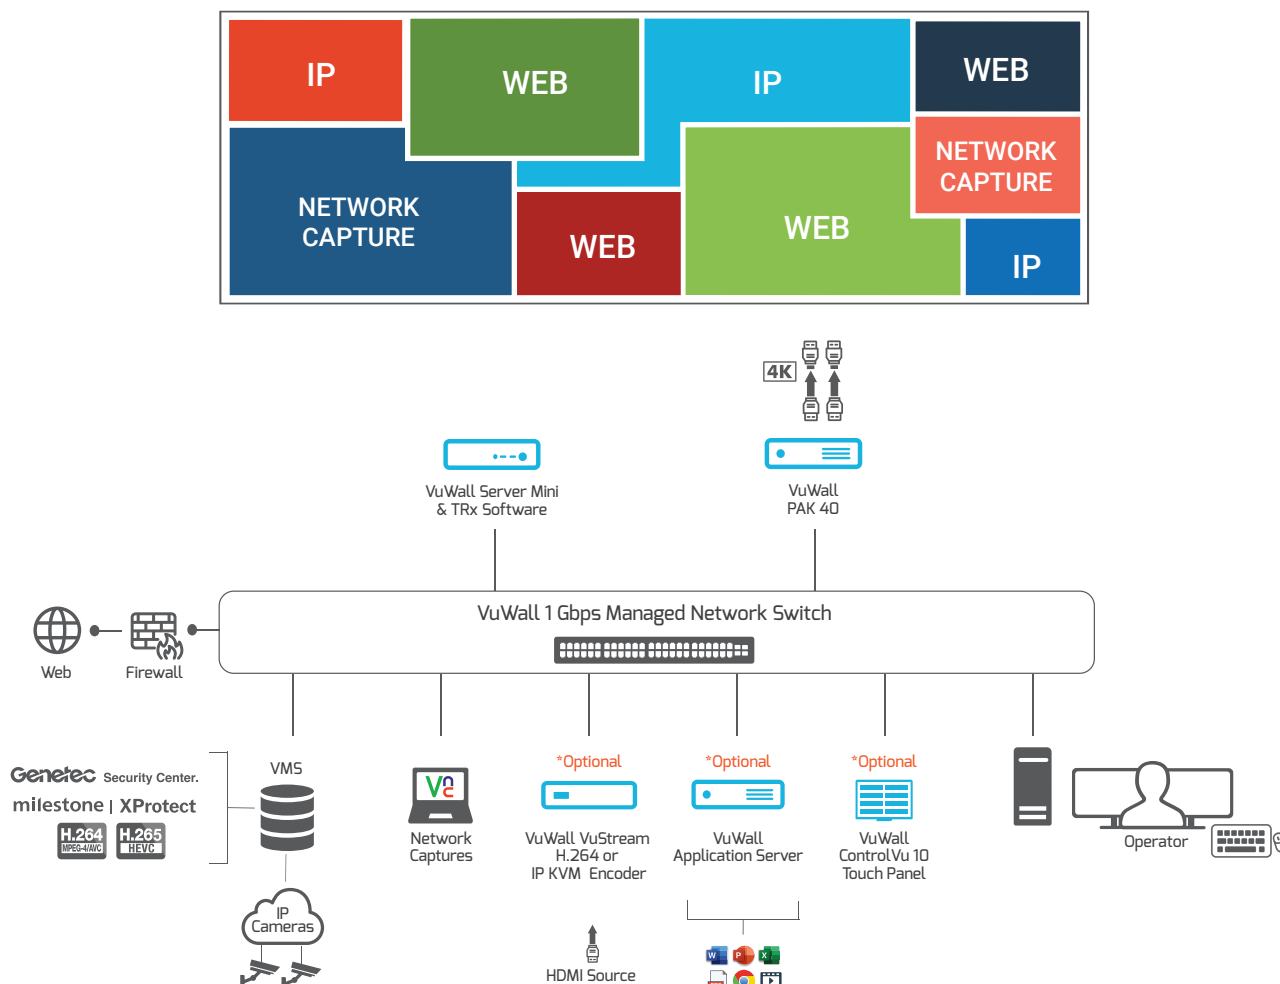

*When testing, the various sources were connected directly to the Samsung S-Box via a 4K HDMI cable.
