

Unified Visualization & Video Wall Management Made Simple

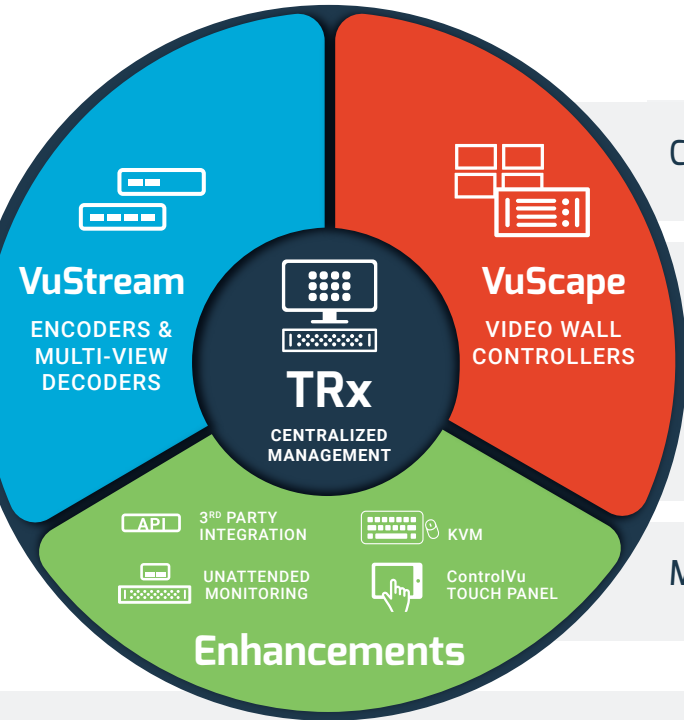

ANY SOURCE. ANY DISPLAY.

Control what you see.

VuWall

VuWall Ecosystem Powered by VuTrex™

The VuWall ecosystem of interoperable products provides the most effective distribution of any source to any display surface throughout organizations. VuTrex™ technology is at the core of every software component in the VuWall ecosystem, bridging AV, IT and IP systems. This unique hybrid technology ensures interoperability, scalability and simplicity, eliminating the need for programming.

Capture

Grab content in any format, decode any stream, and aggregate them seamlessly with local applications.

Distribute

Deliver content from any source to any video wall with simple drag-and-drop operations.

Visualize

Efficiently aggregate content on single displays or multi-surface configurations.

Manage

Easily create custom control panels to operate your visualization system from anywhere.
