Job Location: Pointe-Claire, Quebec

Are you looking for a new challenge in a fast-growing, dynamic high-tech company?
It's time to make a move!

VuWall is a global leader in video wall control systems, providing a complete ecosystem of products recognized for the most effective distribution of any source to any display throughout organizations. We are a privately held company headquartered in the West Island of Montreal with a European subsidiary in Germany. With customers in more than 45 countries, we have deployed over 2000 projects in many Fortune 500 organizations, government agencies, utility, transport, and security companies including the US Departments of Transportation, NASA, Canadian Space Agency, European Commission, Sydney Rail, Porsche, Daimler, L'Oréal, SNCF, and FIFA.

JOB DESCRIPTION

We are looking for a programmer with a keen eye for design. The front-end developer will be responsible for ensuring the alignment of web design and user experience requirements, optimizing web pages for maximum efficiency, and maintaining brand consistency across all web pages, among other duties. The front-end developer will be working in a team alongside back-end developers, graphic designers, and user experience designers to ensure all elements of web creation are consistent. This requires excellent communication and interpersonal skills.

MAIN RESPONSIBILITIES

- Determining the structure and design of web pages.
- Ensuring user experience determines design choices.
- Developing features to enhance the user experience.
- Striking a balance between functional and aesthetic design.
- Building reusable code for future use.
- Optimizing web pages for maximum speed and scalability.
- Utilizing a variety of markup languages to write web pages.
- Maintaining brand consistency throughout the design.

VuWall is committed to building a diverse and inclusive workplace.
