

HELPING OUR PARTNERS

Efficiently Design Video Wall
Projects for Professional Applications

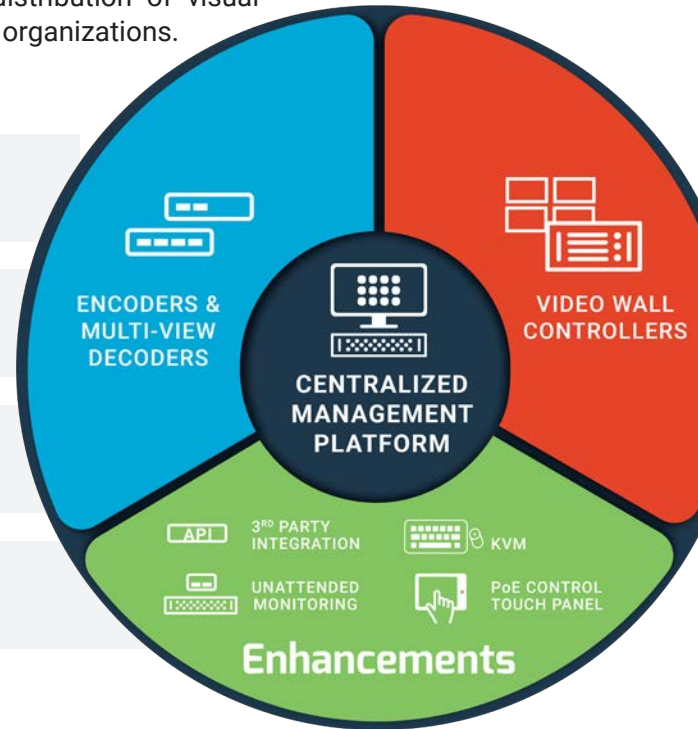

A Modular Approach to Video Wall Management and AV Distribution

VuWall is committed to helping our partners deliver the best solutions to their customers and growing business, together.

We want you to succeed and our dedicated team of experts are here to provide you with the tools and information you need to select the right technology and ensure that every project is specified properly the first time.

VuWall delivers unified visualization solutions for an interconnected world. We are dedicated to bringing innovative technology to your customers that increase productivity and enhance visualization experiences by simplifying workflows in professional and mission-critical environments. Our Global Partner Program provides everything you need to grow your business and ensure your customer's success.

Our complete ecosystem of interoperable products are built on the unique hybrid technology, VuTrex™ that bridges AV, IT and IP systems, delivering the most effective distribution of visual information, from any source to any display or video wall, throughout organizations.

INTEROPERABLE

Seamless integration to reduce deployment time and risk.

HYBRID

Handle a variety of source types, display formats, and technologies

SCALABLE

Modular architecture to future-proof your deployment.

NO PROGRAMMING

Configuration and operation with easy drag and drop.

SOLVING INDUSTRY CHALLENGES

Industry Challenges

A WIDE VARIETY OF TECHNOLOGY

Handle different types of video formats, display technology, and software tools to fulfill the different visualization needs throughout an organization.

CUSTOM PROGRAMMING

Controlling different components often requires custom programming and relying on stable and well-documented API's from each vendor. This is very costly and time-consuming.

CHANGE OF SCOPE

Between the start and end of a project, requirements can change. Change orders and redesigns may demand complex adjustments.

EVOLVING TECHNOLOGY

Designing a project with the confidence that in years from now it will be possible to integrate new technology with the existing infrastructure.

Solutions

A single management platform that bridges AV, IP and IT systems, able to handle a variety of source formats (HDMI, H.264, SDVoE, Web, RSS) and a variety of display formats (LCD, LED, single monitors, video walls, architectural displays, projectors).

A single management platform with easy drag and drop operations and a built-in control panel designer.

A scalable solution built on a modular architecture with a drag and drop interface that facilitates the redesign of preset configurations that include new devices.

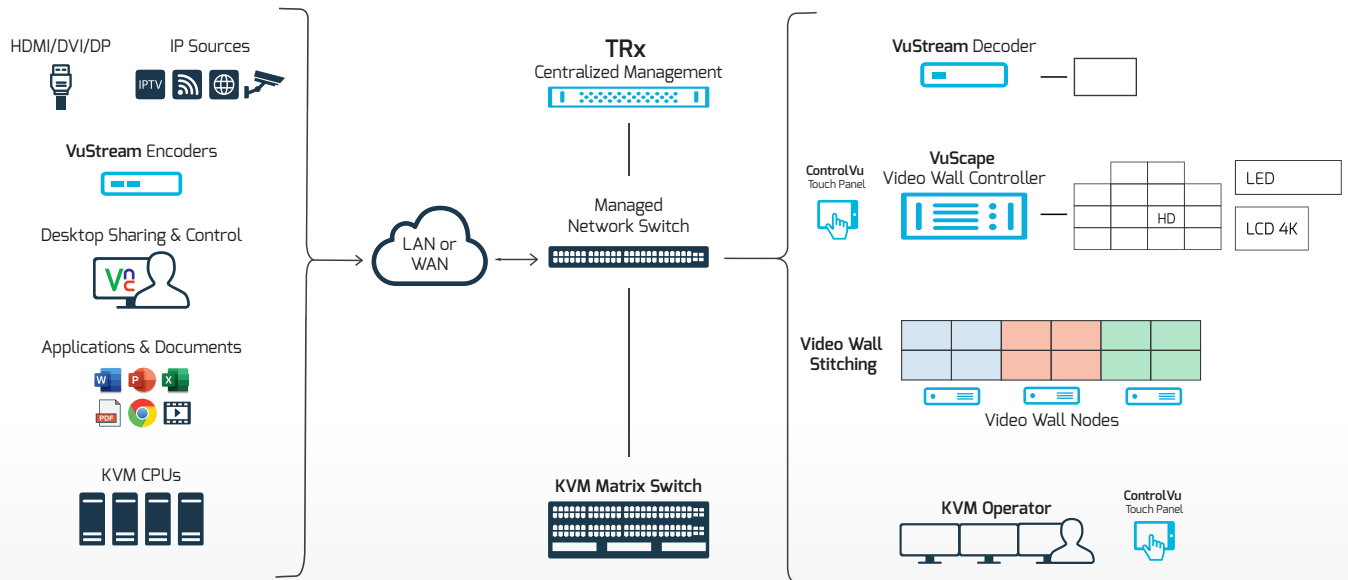

A standards-based, interoperable solution that is built on an open architecture and easily integrates with third-party components with an extensive and fully-documented API.
